

VeniceDrowned

Kim Stanley Robinson

I remember Kim Stanley Robinson as one of the best writers in quite an impressive group of students I taught at the Clarion science fiction writing workshop in the mid-seventies. He was not the one who dismantled the ceiling, though, nor the one who carried around a small bale of marijuana and a glazed expression, nor the one who supposedly had shacked up with one of the instructors, nor the one who liberated the fire hose . . . unfortunately for me, Stan was just a pleasant, hardworking guy who was mainly thereto write, and write well. Which makes it difficult to do a racy introduction for him. Doubly difficult because he pleads modesty and will only reveal the following information:

1. He did his Ph.D. thesis on the novels of Philip K. Dick (whether in the department of English, theology, philosophy, or pharmacy, he does not say).
2. He teaches at theUniversityofCalifornia atDavis .
3. His first novel, *The Wild Shore*, came out from Ace in 1984.

"Venice Drowned" is a nearly flawless exemplar of a kin of writing that can only be done in science fiction. I don't know if it has a name-in academic jargon I suppose it would be something like "refractive mimesis"-but it's that creepy kind of double-vision writing where an imagined world, similar to ours b~ different in some dramatic particular, is described with such painstaking authority that it becomes absolutely real, to such c extent that the world ceases to be simply background for the story; in a curious way, it becomes the story. Philip Dick was the master of this kind of invention, of course, which doesn't detract from Stan's achievement. Rereading it gives me goosebumps.

By the time Carlo Tafur struggled out of sleep, the baby was squalling, the teapot whistled, the smell of stove smoke filled the air. Wavelets slapped the walls of the floor below. It was just dawn. Reluctantly he untangled himself from the bedsheets and got up. He padded through the other room of his home, ignoring his wife and child, and walked out the door onto the roof.

Venice looked best at dawn, Carlo thought as he pissed into the canal. In the dim mauve light it was possible to imagine that the city was just as it always had been, that hordes of visitors would come flooding down the Grand Canal on this fine summer morning Of course, one had to ignore the patchwork constructions built on the roofs of the neighborhood to indulge the fancy. Around the church San Giacomo du Rialto-all the buildings had even their top floors awash, and so it had been necessary to break up the tile roofs, and erect shacks on the roof beams made of materials fished up from below: wood, brick lath, stone, metal, glass. Carlo's home was one of these shacks, made of a crazy combination of wood beams, stained glass from San Giacometta, and drain pipes beaten flat. He looked back at it and sighed. It was best to look off over the Rialto, where the red sun blazed over the bulbous domes of San Marco.

"You have to meet those Japanese today," Carlo's wife, Luisa, said from inside.

"I know." Visitors still came to Venice, that was certain.

"And don't go insulting them and rowing off without your pay," she went on, her voice sounding clearly out of the doorway, "like you did with those Hungarians. It really doesn't matter what they take from under the water, you know. That's the past. That old stuff isn't doing anyone any good under there, anyway."

"Shut up," he said wearily. "I know."

"I have to buy stovewood and vegetables and toilet paper and socks for the baby." she said. "The Japanese are the best customers you've got; you'd better treat them well."

Carlo reentered the shack and walked into the bedroom to dress. Between putting on one boot and the next he stopped to smoke a cigarette, the last one in the house. While smoking he stared at his pile of books on the floor, his library as Luisa sardonically called the collection; all books about Venice. They were tattered, dog-eared, mildewed, so warped by the damp that none of them would close properly,

and each moldy page was as wavy as the Lagoon on a windy day.- They were a miserable sight, and Carlo gave the closest stack a light kick with his cold boot as he returned to the other room.

"I'm off," he said, giving his baby and then Luisa a kiss. "I'll be back late; they want to go to Torcello."

"What could they want up there?"

He shrugged. "Maybe just to see it." He ducked out the door.

Below the roof was a small square where the boats of the neighborhood were moored. Carlo slipped off the tile onto the narrow floating dock he and the neighbors had built, and crossed to his boat, a wide-beamed sailboat with a canvas deck. He stepped in, unmoored it, and rowed out of the square onto the Grand Canal .

Once on the Grand Canal he tipped the oars out of the water and let the boat drift downstream. The big canal had

always been the natural course of the channel through the mudflats of the Lagoon; for a while it had been tamed, but now it was a river again, its banks made of tile rooftops and stone palaces, with hundreds of tributaries flowing into it. Men were working on roofhouses in the early-morning light; those who knew Carlo waved, hammers or rope in hand, and shouted hello. Carlo wiggled an oar perfunctorily before he was swept past. It was foolish to build so close to the Grand Canal , which now had the strength to knock the old structures down, and often did. But that was their business. In Venice they were all fools, if one thought about it.

Then he was in the Basin of San Marco , and he rowed through, the Piazzetta beside the Doge's Palace, which was still imposing at two stories high, to the Piazza. Traffic was heavy as usual. It was the only place in Venice that still had the crowds of old, and Carlo enjoyed it for that reason, though he shouted curses as loudly as anyone when gondolas streaked in front of him. He jockeyed his way to the Basilica window and rowed in.

Under the brilliant blue and gold of the domes it was noisy. Most of the water in the rooms had been covered with a floating dock. Carlo moored his boat to it, heaved his four scuba tanks on, and clambered up after them. Carrying two tanks in each hand he crossed the dock, on which the fish market was in full swing. Displayed for sale were flats of mullet, lagoon sharks, tunny, skates, and flatfish. Clams were piled in trays, their shells gleaming in the shaft of sunlight from the stained-glass east window; men and women pulled live crabs out of holes in the dock, risking fingers in the crab-jammed traps below;

octopuses inked their buckets of water, sponges oozed foam; fishermen bawled out prices, and insulted the freshness of their neighbors' product.

In the middle of the fish market, Ludovico Salerno, one of Carlo's best friends, had his stalls of scuba gear. Carlo's two Japanese customers were there. He greeted them and handed his tanks to Salerno, who began refilling them from his ma

chine. They conversed in quick, slangy Italian while the tanks filled. When they were done, Carlo paid him and led the Japanese back to his boat. They got in and stowed their backpacks under the canvas decking, while Carlo pulled the scuba tanks on board.

"We are ready to voyage at Torcello?" one asked, and the other smiled and repeated the question. Their names were Hamada and Taku. They had made a few jokes concerning the latter name's similarity to Carlo's own, but Taku was the one with less Italian, so the sallies hadn't gone on for long. They had hired him four days before, at Salerno's stall.

"Yes," Carlo said. He rowed out of the Piazza and up back canals past Campo San Maria Formosa, which was nearly as crowded as the Piazza. Beyond that the canals were empty, and only an occasional roof-house marred the look of flooded tranquillity.

"That part of city Venice here not many people live," Hamada observed. "Not houses on houses."

"That's true," Carlo replied. As he rowed past San Zanipolo and the hospital, he explained, "It's too close to the hospital here, where many diseases were contained. Sickesses, you know."

"Ah, the hospital!" Hamada nodded, as did Taku. "We have swam hospital in our Venice voyage previous to that one here. Salvage many fine statues from lowest rooms."

"Stone lions," Taku added. "Many stone lions with wings in room below Twenty-forty' waterline."

"Is that right," Carlo said. Stone lions, he thought, set up in the entryway of some Japanese businessman's expensive home around the world He tried to divert his thoughts by watching the brilliantly healthy, mask like faces of his two passengers as they laughed over their reminiscences.

Then they were over the Fondamente Nuova, the northern limit of the city, and on the Lagoon. There was a small swell from the north. Carlo rowed out a way and then stepped forward to raise the boat's single sail. The wind was from the

east, so they would make good time north to Torcello. Behind them, Venice looked beautiful in the morning light, as if they were miles away, and a watery horizon blocked their full view of it.

The two Japanese had stopped talking and were looking over the side. They were over the cemetery of San Michele, Carlo realized. Below them lay the island that had been the city's chief cemetery for centuries; they sailed over a field of tombs, mausoleums, gravestones, obelisks, that at low tide could be a navigational hazard Just enough of the bizarre white blocks could be seen to convince one that they were indeed the result of the architectural thinking of fishes. Carlo crossed himself quickly to impress his customers, and sat back down at the tiller. He pulled the sail tight and they heeled over slightly, slapped into the waves.

In no more than twenty minutes they were east of Murano, skirting its edge. Murano, like Venice an island city crossed with canals, had been a quaint little town before the flood. But it didn't have as many tall buildings as Venice, and it was said that an underwater river had undercut its islands; in any case, it was a wreck. The two Japanese chattered with excitement.

"Can we visit to that city here, Carlo?" asked Hamada.

"It's too dangerous," Carlo answered. "Buildings have fallen into the canals."

They nodded, smiling. "Are people live here?" Taku asked.

"A few, yes. They live in the highest buildings on the floors still above water, and work in Venice. That way they avoid having to build a roof-house in the city."

The faces of his two companions expressed incomprehension.

"They avoid the housing shortage in Venice," Carlo said. "There's a certain housing shortage in Venice, as you may have noticed." His listeners caught the joke this time and laughed uproariously.

"Could live on floors below if owning scuba such as that

here," Hamada said, gesturing at Carlo's equipment.

"Yes," he replied. "Or we could grow gills." He bugged his eyes out and waved his fingers at his neck to indicate gills. The Japanese loved it.

Past Murano, the Lagoon was clear for a few miles, a sunbeaten blue covered with choppy waves.

The boat tipped up and down, the wind tugged at the sail cord in Carlo's hand. He began to enjoy himself. "Storm coming," he volunteered to the others and pointed at the black line over the horizon to the north. It was a common sight; short, violent storms swept over Brenner Pass from the Austrian Alps, dumping on the Po Valley and the Lagoon before dissipating in the Adriatic . . . once a week, or more, even in the summer. That was one reason the fish market was held under the domes of San Marco; everyone had gotten sick of trading in the rain.

Even the Japanese recognized the clouds. "Many rain fall soon here," Taku said.

Hamada grinned and said, "Taku and Tafui, weather prophets no doubt, make big company!"

They laughed. "Does he do this in Japan, too?" Carlo asked.

"Yes indeed, surely. In Japan rains every day-Taku says, 'It rains tomorrow for surely.' Weather prophet!"

After the laughter receded, Carlo said, "Hasn't all the rain drowned some of your cities too?"

"What's that here?"

"Don't you have some Venices in Japan?"

But they didn't want to talk about that. "I don't understand No, no Venice in Japan," Hamada said easily, but neither laughed as they had, before. They sailed on. Venice was out of sight under the horizon, as was Murano., Soon they would reach Burano. Carlo guided the boat over the waves and listened to his companions converse in their improbable language, or mangle Italian in a way that alternately made him want to burst with hilarity or bite the gunwale with

frustration.

Gradually, Burano bounced over the horizon, the campanile first, followed by the few buildings still above water. Murano still had inhabitants, a tiny market, even a midsummer festival; Burano was empty. Its campanile stood at a distinct angle, like the mast of a foundered ship. It had been an island town, before 2040; now it had "canals" between every rooftop. Carlo disliked the town intensely and gave it a wide berth. His companions discussed it quietly in Japanese.

A mile beyond it was Torcello, another island ghost town. The campanile could be seen from Burano, tall and white against the black clouds to the north. They approached in silence. Carlo took down the sail, set Taku in the bow to look for snags, and rowed cautiously to the edge of town. They moved between rooftops and walls that stuck up like reefs or like old foundations out of the earth. Many of the roof tiles and beams had been taken for use in construction back in Venice. This happened to Torcello before; during the Renaissance it had been a little rival of Venice, boasting a population of twenty thousand, but during the sixteenth and seventeenth centuries it had been entirely deserted. Builders from Venice had come looking in the ruins for good marble or a staircase of the right dimensions Briefly a tiny population had returned, to make lace and host those tourists who wanted to be melancholy; but the waters rose, and Torcello died for good. Carlo pushed off a wall with his oar, and a big section of it tilted over and sank. He tried not to notice.

He rowed them to the open patch of water that had been the Piazza. Around them stood a few intact rooftops, no taller than the mast of their boat; broken walls of stone or rounded brick; the shadowy suggestion of walls just underwater. It was hard to tell what the street plan of the town would have been.

On one side of the Piazza was the cathedral of Santa Maria Ascunta, however, still holding fast, still supporting the white campanile that stood square and solid, as if over a living community.

"That here is the church we desire to dive," Hamada said.

Carlo nodded. The amusement he had felt during the sail

was entirely gone. He rowed around the Piazza looking for a flat spot where they could stand and put the scuba gear on. The church outbuildings-it had been an extensive structure were all underwater. At one point the boat's keel scraped the ridge of a roof. They rowed down the length of the barnlike nave, looked in the high windows: flooded with water. No surprise. One of the small windows in the side of the campanile had been widened with sledgehammers; directly inside it was the stone staircase and, a few steps up, a stone floor. They hooked the boat to the wall and moved their gear up to the floor. In the dim midday light the stone of the interior was pocked with shadows. It had a rough-hewn look. The citizens of Torcello had built the campanile in a hurry, thinking that the world would end at the millennium, the year 1000. Carlo snuled to think how much longer they had had than that. They climbed the steps of the staircase, up to the sudden sunlight of the bell chamber, to look around; viewed Burano, Venice in the distance . . . to the north, the shallows of the Lagoon, and the coast of Italy. Beyond that, the black line of clouds was like a wall nearly submerged under the horizon, but it was rising; the storm would come.

They descended, put on the scuba gear, and flopped into the water beside the campanile. They were above the complex of church buildings, and it was dark; Carlo slowly led the two Japanese back into the Piazza and swam down. The ground was silted, and Carlo was careful not to step on it. His charges saw the great stone chair in the center of the Piazza (it had been called the Throne of Attila, Carlo remembered from one of his moldy books, and no one had known why), and waving to each other they swam to it. One of them made ludicrous attempts to stand on the bottom and walk around in his fins; he threw up clouds of silt. The other joined him. They each sat in the stone chair, columns of bubbles rising from them, and snapped pictures of each other with their underwater cameras. The silt would ruin the shots, Carlo thought. While they cavorted, he wondered sourly what they wanted in the church.

Eventually, Hamada swam up to him and gestured at the church. Behind the mask his eyes were excited. Carlo pumped his fins up and down slowly and led them around to the big entrance at the front. The doors were gone. They swam into the church.

Inside it was dark, and all three of them unhooked their big flashlights and turned them on. Cones of murky water turned to crystal as the beams swept about. The interior of the church was undistinguished, the floor thick with mud. Carlo watched his two customers swim about and let his flashlight beam rove the walls. Some of the underwater windows were still intact, an odd sight. Occasionally the beam caught a column of bubbles, transmuting them to silver.

Quickly enough the Japanese went to the picture at the west end of the nave, a tile mosaic. Taku (Carlo guessed) rubbed the slime off the tiles, vastly improving their color. They had gone to the big one first, the one portraying the Crucifixion, the Resurrection of the Dead, and the Day of Judgment: a busy mural. Carlo swam over to have a better look. But no sooner had the Japanese wiped the wall clean than they were off to the other end of the church, where above the stalls of the apse was another mosaic. Carlo

followed.

It didn't take long to rub this one clean; and when the water had cleared, the three of them floated there, their flashlight beams converged on the picture revealed.

It was the Teotaca Madonna, the God-bearer. She stood against a dull gold background, holding the Child in her arms, staring out at the world with a sad and knowing gaze. Carlo pumped his legs to get above the Japanese, holding his light steady on the Madonna's face. She looked as though she could see all of the future, up to this moment and beyond; all of her child's short life, all the terror and calamity after that There were mosaic tears on her cheeks. At the sight of them, Carlo could barely check tears of his own from joining the general wetness on his face. He felt that he had suddenly been transposed to a church on the deepest floor of the ocean; the pressure of his feelings threatened to implode him, he could

scarcely hold them off. The water was freezing, he was shivering, sending up a thick, nearly continuous column of bubbles . . . and the Madonna watched. With a kick he turned and swam away. Like startled fish his two companions followed him. Carlo led them out of the church into murky light, then up to the surface, to the boat and the window casement.

Fins off, Carlo sat on the staircase and dripped. Taku and Hamada scrambled through the window and joined him. They conversed for a moment in Japanese, clearly excited. Carlo stared at them blackly.

Hamada turned to him. "That here is the picture we desire," he said. "The Madonna with child."

"What?" Carlo cried.

Hamada raised his eyebrows. "We desire taking home that here picture to Japan ."

"But it's impossible! The picture is made of little tiles stuck to the wall-there's no way to get them off!"

"Italy government permits," Taku said, but Hamada silenced him with a gesture:

"Mosaic, yes. We use instruments we take here-water torch. Archaeology method, you understand. Cut blocks out of wall, bricks, number them-construct on new place inJapan . Above water." He flashed his pearly smile.

"You can't do that," Carlo stated, deeply affronted.

"I don't understand?" Hamada said. But he did: "Italian government permits us that."

"This isn'tItaly ," Carlo said savagely, and in his anger stood up. What good would a Madonna do inJapan , anyway? They weren't even Christian. "Italyis over there," he said, in his excitement mistakenly waving to the southeast, no doubt confusing his listeners even more. "This has never beenItaly ! This isVenice ! The Republic!"

"I don't understand." He had that phrase down pat. "Italian government has giving permit us."

"Christ," Carlo said. After a disgusted pause: "Just how long will this take?"

"Time? We work that afternoon, tomorrow: place the

bricks here, go hireVenice barge to carry bricks toVenice-- "

"Stay here overnight? I'm not going to stay here overnight, God damn it!"

"We bring sleeping bag for you--"

"No!" Carlo was furious. "I'm not staying, you miserable heathen hyenas--" He pulled off his scuba gear.

"I don't understand."

Carlo dried off, got dressed. "I'll let you keep your scuba tanks, and I'll be back for you tomorrow afternoon, late. Understand."

"Yes," Hamada said. staring at him steadily, without expression. "Bring barge?"

"What?-yes, yes, I'll bring your barge, you miserable slime-eating catfish. Vultures . . ." He went on for a while. getting the boat out of the window.

"Storm coming!" Taku said brightly, pointing to the north.

"To hell with you!" Carlo said, pushing off and beginning to row. "Understand?"

He rowed out of Torcello and back into the Lagoon. Indeed, a storm was coming: he would have to hurry. He put up the sail and pulled the canvas decking back until it covered everything but the seat he was sitting on. The wind was from the north now, strong but fitful. It pulled the sail taut: the boat bucked over the choppy waves, leaving behind a wake that was bright white against the black of the sky. The clouds were drawing over the sky like a curtain, covering half of it: half black, half colorless blue, and the line of the edge was solid. It resembled that first great storm of 2040, Carlo guessed, that had pulled over Venice like a black wool blanket and dumped water for forty days. And it had never been the same again, not anywhere in the world

Now he was beside the wreck of Burano. Against the black sky he could see only the drunken campanile. and suddenly he realized why he hated the sight of this abandoned town: it was a vision of the Venice to come, a cruel model of

the future. If the water level rose even three meters, Venice would become nothing but a big Burano. Even if the water didn't rise, more people were leaving Venice every year One day it would be empty. Once again the sadness he had felt looking at the Teotaca filled him, a sadness become a bottomless despair. "God damn it," he said, staring at the crippled campanile: but that wasn't enough. He didn't know words that were enough. "God damn it."

Just beyond Burano the squall hit. It almost blew the sail out of his hand: he had to hold on with a fierce clench, tie it to the stern, tie the tiller in place, and scramble over the pitching canvas deck to lower the sail. cursing all the while. He brought the sail down. to its last reefing, which left a handkerchief sized patch exposed to the wind. Even so, the boat yanked over the waves and the mast creaked as if it would tear loose The choppy waves had become whitecaps: in the screaming wind their tops were tearing loose and flying through the air, white foam in the blackness

Best to head for Murano for refuge, Carlo thought. Then the rain started. It was colder than the Lagoon water and fell almost horizontally. The wind was still picking up: his handkerchief sail was going to pull the mast out "Jesus," he said. He got onto the decking again, slid up to the mast, took down the sail with cold and disobedient fingers. He crawled back to his hole in the deck, hanging on desperately as the boat yawed. It was almost broadside to the waves and hastily he grabbed the tiller and pulled it around, just in time to meet a large wave stern-on. He shuddered with relief. Each wave seemed bigger than the last: they picked up quickly on the Lagoon. Well, he thought, what now? Get out the oars? No, that wouldn't do; he had to keep stern-on to the waves, and besides, he couldn't row effectively in this chop. He had to go where the waves were going, he realized: and if they missed Murano and Venice , that meant the Adriatic .

As the waves lifted and dropped him, he grimly contemplated the thought. His mast alone acted like a sail in a wind

of this force; and the wind seemed to be blowing from a bit to the west of north. The waves-the biggest he had ever seen on the Lagoon, perhaps the biggest ever on the Lagoon-pushed in about the same

direction as the wind, naturally. Well, that meant he would miss Venice, which was directly south, maybe even a touch west of south. Damn, he thought. And all because he had been angered by those two Japanese and the Teotaca. What did he care what happened to a sunken mosaic from Torcello? He had helped foreigners find and cart off the one bronze horse of San Marco that had fallen . . . more than one of the stone lions of Venice, symbol of the city . . . the entire Bridge of Sighs, for Christ's sake! What had come over him? Why should he have cared about a forgotten mosaic?

Well, he had done it; and here he was. No altering it. Each wave lifted his boat stern first and slid under it until he could look down in the trough, if he cared to, and see his mast nearly horizontal, until he rose over the broken, foaming crest, each one of which seemed to want to break down his little hole in the decking and swamp him—for a second he was in midair, the tiller free and useless until he crashed into the next trough. Every time at the top he thought, this wave will catch us, and so even though he was wet and the wind and rain were cold, the repeated spurts of fear adrenaline and his thick wool coat kept him warm. A hundred waves or so served to convince him that the next one would probably slide under him as safely as the last, and he relaxed a bit. Nothing to do but wait it out, keep the boat exactly stern-on to the swell . . . and he would be all right. Sure, he thought, he would just ride these waves across the Adriatic to Trieste or Rijeka, one of those two tawdry towns that had replaced Venice as Queen of the Adriatic . . . the princesses of the Adriatic, so to speak, and two little sluts they were, too . . . Or ride the storm out, turn around, and sail back in, better yet . . .

On the other hand, the Lido had become a sort of reef, in most places, and waves of this size would break over it, capsizing him for sure. And, to be realistic, the top of the Adriatic

was wide; just one mistake on the top of these waves (and he couldn't go on forever) and he would be broached, capsized, and rolled down to join all the other Venetians who had ended up on the bottom of the Adriatic. And all because of that damn Madonna. Carlo sat crouched in the stern, adjusting the tiller for the particulars of each wave, ignoring all else in the howling, black, horizonless chaos of water and air around him, pleased in a grim way that he was sailing to his death with such perfect seamanship. But he kept the Lido out of mind.

And so he sailed on, losing track of time as one does when there is no spatial referent. Wave after wave after wave. A little water collected at the bottom of his boat, and his spirits sank; that was no way to go, to have the boat sink by degrees under him . . .

Then the high-pitched, airy howl of the wind was joined by a low booming, a bass roar. He looked behind him in the direction he was being driven and saw a white line, stretching from left to right; his heart jumped, fear exploded through him. This was it. The Lido, now a barrier reef tripping the waves. They were smashing down on it; he could see white sheets bouncing skyward and blowing to nothing. He was terrifically frightened. It would have been so much easier to founder at sea.

But there—among the white breakers, off to the right—a gray finger pointing up at the black-

A campanile. Carlo was forced to look back at the wave he was under, to straighten the boat; but when he looked back it was still there. A campanile, standing there like a dead lighthouse. "Jesus," he said aloud. It looked as if the waves were pushing him a couple hundred meters to the north of it. As each wave lifted him he had a moment when the boat was sliding down the face of the wave as fast as it was moving under him; during these moments he shifted the tiller a bit and the boat turned and surfed across the face, to the south, until the wave rose up under him to the crest, and he had to

straighten it out. He repeated the delicate operation time after time, sometimes nearly broaching the boat in his impatience. But that wouldn't do-just take as much from each wave as it will give you, he thought. And pray it will add up to enough.

The Lido got closer, and it looked as if he was directly upwind of the campanile. It was the one at the Lido channel entrance or perhaps the one at Pellestrina, farther south; he had no way of knowing and couldn't have cared less. He was just happy that his ancestors had seen fit to construct such solid bell towers. In between waves he reached under the decking and by touch found his boathook and the length of rope he carried. It was going to be a problem, actually, when he got to the campanile-it would not do to pass it helplessly by a few meters; on the other hand he couldn't smash into it and expect to survive either, not in these waves. In fact the more he considered it, the more exact and difficult he realized the approach would have to be, and fearfully he stopped thinking about it and concentrated on the waves.

The last one was the biggest. As the boat slid down its face, the face got steeper until it seemed they would be swept on by this wave forever. The campanile loomed ahead, big and black. Around it, waves pitched over and broke with sharp, deadly booms; from behind, Carlo could see the water sucked over the breaks, as if over short but infinitely broad waterfalls. The noise was tremendous. At the top of the wave it appeared he could jump in the campanile's top window she got out the boathook, shifted the tiller a touch, took three deep breaths. Amid the roaring, the wave swept him just past the stone tower, smacking against it and splashing him; he pulled the tiller over hard, the boat shot into the wake of the campanile-he stood and swung the boathook over a window casement above him. It caught, and he held on hard.

He was in the lee of the tower; broken water rose and dropped under the boat, hissing, but without violence, and he held. One handed, he wrapped the end of his rope around the sail cord bolt in the stern, tied the other end to the boathook.

The hook held pretty well; he took a risk and reached down to tie the rope firmly to the bolt. Then another risk: when the boiling soupy water of another broken wave raised the boat, he leaped off his seat, grabbed the stone windowsill, which was too thick to get his fingers over-for a moment he hung by his fingertips. With desperate strength he pulled himself up, reached in with one hand and got a grasp on the inside of the sill, and pulled himself in and over. The stone floor was about four feet below the window. Quickly he pulled the boathook in and put it on the floor, and took up the slack in the rope.

He looked out the window. His boat rose and fell, rose and fell. Well, it would sink or it wouldn't. Meanwhile, he was safe. Realizing this, he breathed deeply, let out a shout. He remembered shooting past the side of the tower, face no more than two meters from it getting drenched by the wave slapping the front of it-why, he had done it perfectly! He couldn't do it again like that in a million tries. Triumphant laughs burst out of him, short and sharp: "Ha! Ha! Ha! Jesus Christ! Wow!"

"Whoooo's theeeerre?" called a high scratchy voice, floating down the staircase from the floor above.
"Whooooo's there? . . .

Carlo froze. He stepped lightly to the base of the stone staircase and peered up; through the hole to the next floor flickered a faint light. To put it better, it was less dark up there than anywhere else. More surprised than fearful (though he was afraid), Carlo opened his eyes as wide as he could

"Whooooo's theeeeeerrrrrrre? . . .

Quickly he went to the boathook, untied the rope, felt around on the wet floor until he found a block of stone that would serve as anchor for his boat. He looked out the window: boat still there; on both sides, white breakers crashed over the Lido. Taking up the boathook, Carlo stepped slowly up the stairs, feeling that after what he had been through he could slash any ghost in the ether to ribbons.

It was a candle lantern, flickering in the disturbed air—a room filled with junk

"Eeek! Eeek!"

"Jesus!"

"Devil! Death, away!" A small black shape rushed at him, brandishing sharp metal points.

"Jesus!" Carlo repeated, holding the boathook out to defend himself. The figure stopped.

"Death comes for me at last," it said. It was an old woman, he saw, holding lace needles in each hand.

"Not at all," Carlo said, feeling his pulse slow back down. "Swear to God, Grandmother, I'm just a sailor, blown here by the storm."

The woman pulled back the hood of her black cape, revealing braided white hair, and squinted at him.

"You've got the scythe," she said suspiciously. A few wrinkles left her face as she unfocused her gaze.

"A boathook only," Carlo said, holding it out for her inspection. She stepped back and raised the lace needles threateningly. "Just a boathook, I swear to God. To God and Mary and Jesus and all the saints, Grandmother. I'm just a sailor, blown here by the storm from Venice." Part of him felt like laughing.

"Aye?" she said. "Aye, well then, you've found shelter. I don't see so well anymore, you know. Come in, sit down, then." She turned around and led him into the room. "I was just doing some lace for penance, you see . . . though there's scarcely enough light." She lifted a tomboli with the lace pinned to it; Carlo noticed big gaps in the pattern, as in the webs of an injured spider. "A little more light," she said and, picking up a candle, held it to the lit one. When it was fired, she carried it around the chamber and lit three more candles in lanterns that stood on tables, boxes, a wardrobe. She motioned for him to sit in a heavy chair by her table, and he did so.

As she sat down across from him, he looked around the

chamber. A bed piled high with blankets, boxes and tables: covered with objects . . . the stone walls around, and another staircase leading up to the next floor of the campanile. There was a draft. "Take off your coat," the woman said. She arranged the little pillow on the arm of her chair and began to poke a needle in and out of it, pulling the thread slowly.

Carlo sat back and watched her. "Do you live here alone?"

"Always alone," she replied. "I don't want it otherwise." With the candle before her face, she resembled Carlo's mother or someone else he knew. It seemed very peaceful in the room after the storm. The old woman bent in her chair until her face was just above her tomboli; still, Carlo couldn't help,; noticing that her needle hit far outside the apparent pattern of lace, striking here and there randomly. She might as well have been blind. At regular intervals Carlo shuddered with excitement and tension; it was hard to believe he was out of danger More infrequently they broke the silence with a short burst of conversation, then sat in the candlelight absorbed in their own thoughts, as if they were old friends.

"How do you get food?" Carlo asked, after one of these silences had stretched out. "Or candles?"

"I trap lobsters down below. And fishermen come by and trade food for lace. They get a good bargain, never fear. I've never given less, despite what he said-" Anguish twisted here face as the squinting had, and she stopped. She needled furiously, and Carlo looked away. Despite the draft, he was warming up (he hadn't removed his coat, which was wool, after all), and he was beginning to feel drowsy

"He was my spirit's mate, do you comprehend me?"

Carlo jerked upright. The old woman was still looking at her tomboli. -

"And-and he left me here, here in this desolation when the floods began, with words that I'll remember forever and ever and ever. Until death comes I wish you had been' death!" she cried. "I wish you had."

Carlo remembered her brandishing the needles. "What is this place?" he asked gently.

"What?"

"Is this Pellestrina? San Lazzaro?"

"This is Venice," she said.

Carlo shivered convulsively, stood up.

"I'm the last of them," the woman said. "The waters rise, the heavens howl, love's pledges crack and lead to misery. I-I live to show what a person can bear and not die. I'll live till the deluge drowns the world as Venice is drowned, I'll live till all else living is dead; I'll live . . ." Her voice trailed off; she looked up at Carlo curiously. "Who are you, really? Oh. I know. I know. A sailor."

"Are there floors above?" he asked, to change the subject.

She squinted at him. Finally she spoke. "Words are vain. I thought I'd never speak again, not even to my own heart, and here I am, doing it again. Yes, there's a floor above intact; but above that, ruins. Lightning blasted the bell chamber apart, while I lay in that very bed." She pointed at her bed, stood up. "Come on, I'll show you." Under her cape she was tiny.

She picked up the candle lantern beside her, and Carlo followed her up the stairs, stepping carefully in the shifting shadows.

On the floor above, the wind swirled, and through the stairway to the floor above that, he could distinguish black clouds. The woman put the lantern on the floor, started up the stairs. "Come up and see," she said.

Once through the hole they were in the wind, out under the sky. The rain had stopped. Great blocks of stone lay about the floor, and the walls broke off unevenly.

"I thought the whole campanile would fall," she shouted at him over the whistle of the wind. He nodded, and walked over to the west wall, which stood chest high. Looking over it, he could see the waves approaching, rising up, smashing against the stone below, spraying back and up at him. He

could feel the blows in his feet. Their force frightened him; it was hard to believe he had survived them and was now out of danger. He shook his head violently. To his right and left, the white lines of crumbled waves marked the Lido, a broad swath of them against the black. The old woman was speaking, he could see; he walked back to her side to listen.

"The waters yet rise," she shouted. "See? And the lightning . . . you can see the lightning breaking the Alps to dust. It's the end, child. Every island fled away, and the mountains were not found . . . the second angel poured out his vial upon the sea, and it became as the blood of a dead man: and every living thing died in the sea." On and on she spoke, her voice mingling with the sound of the gale and the boom of the waves, just carrying over it all . . . until Carlo, cold and tired, filled with pity and a black anguish like the clouds rolling over them, put his arm around her thin shoulders and turned her around. They descended to the floor below, picked up the extinguished lantern, and descended to her chamber, which was still lit. It seemed warm, a refuge. He could hear her still speaking. He was shivering without pause.

"You must be cold," she said in a practical tone. She pulled a few blankets from her bed. "Here, take these." He sat down in the big heavy chair, put the blankets around his legs, put his head back. He was tired. The old woman sat in her chair and wound thread onto a spool. After a few minutes of silence she began talking again; and as Carlo dozed and shifted position and nodded off again, she talked and talked, of storms, and drownings, and the world's end, and lost love

In the morning when he woke up, she wasn't there. Her room stood revealed in the dim morning light: shabby, the furniture battered, the blankets worn, the knickknacks of Venetian glass ugly, as Venetian glass always was . . . but it was clean. Carlo got up and stretched his stiff muscles. He went up to the roof; she wasn't there. It was a sunny morning. Over the east wall he saw that his boat was still there, still floating. He

grinned-the first one in a few days; he could feel that in his face.

The woman was not in the floors below, either. The lowest one served as her boathouse, he could see. In it were a pair of decrepit rowboats and some lobster pots. The biggest "boatslip" was empty; she was probably out checking pots. Or perhaps she hadn't wanted to talk with him in the light of day.

From the boathouse he could walk around to his craft, through water only knee deep. He sat in the stern, reliving the previous afternoon, and grinned again at being alive.

He took off the decking and bailed out the water on the keel with his bailing can, keeping an eye out for the old woman. Then he remembered the boathook and went back upstairs for it. When he returned there was still no sight of her. He shrugged; he'd come back and say good-bye another time. He rowed around the campanile and off the Lido, pulled up the sail, and headed northwest, where he presumed Venice was.

The Lagoon was as flat as a pond this morning, the sky cloudless, like the blue dome of a great basilica. It was amazing, but Carlo was not surprised. The weather was like that these days. Last night's storm, however, had been something else. There was the mother of all squalls; those were the biggest waves in the Lagoon ever, without a doubt. He began rehearsing his tale in his mind, for wife and friends.

Venice appeared over the horizon right off his bow, just where he thought it would be: first the great campanile, then San Marco and the other spires. The campanile . . . Thank God his ancestors had wanted to get up there so close to God-or so far off the water-the urge had saved his life. In the rain-washed air, the sea approach to the city was more beautiful than ever, and it didn't even bother him as it usually did that no matter how close you got to it, it still seemed to be over the horizon. That was just

the way it was, now. The Serenissima. He was happy to see it.

He was hungry, and still very tired. When he pulled into

the Grand Canal and took down the sail, he found he could barely row. The rain was pouring off the land into the Lagoon, and the Grand Canal was running like a mountain river. It was tough going. At the fire station where the canal bent back, some of his friends working on a new roof-house waved at him, looking surprised to see him going upstream so early in the morning. "You're going the wrong way!" one shouted.

Carlo waved an oar weakly before plopping it back in. "Don't I know it!" he replied.

Over the Rialto, back into the little courtyard of San Giacometta. Onto the sturdy dock he and his neighbors had built, staggering a bit careful there, Carlo.

"Carlo!" his wife shrieked from above. "Carlo, Carlo, Carlo!" She flew down the ladder from the roof.

He stood on the dock. He was home.

"Carlo, Carlo, Carlo!" his wife cried as she ran onto the dock.

"Jesus," he pleaded, "shut up." And pulled her into a rough hug.

"Where have you been, I was so worried about you because of the storm, you said you'd be back yesterday, oh, Carlo, I'm so glad to see you . . ." She tried to help him up the ladder. The baby was crying. Carlo sat down in the kitchen chair and looked around the little makeshift room with satisfaction. In between chewing down bites of a loaf of bread, he told Luisa of his adventure: the two Japanese and their vandalism, the wild ride across the Lagoon, the madwoman on the campanile. When he had finished the story and the loaf of bread, he began to fall asleep.

"But, Carlo, you have to go back and pick up those Japanese."

"To hell with them," he said slurrily. "Creepy little bastards They're tearing the Madonna apart, didn't I tell you? They'll take everything in Venice, every last painting and statue and carving and mosaic and all ... I can't stand it."

"Oh, Carlo . . . it's all right. They take those things all

over the world and put them up and say this is from Venice, the greatest city in the world."

"They should be here."

"Here, here, come in and lie down for a few hours. I'll go see if Giuseppe will go to Torcello with you to bring back those bricks." She arranged him on their bed. "Let them have what's under the water, Carlo. Let them have it." He slept.

He sat up struggling, his arm shaken by his wife.

"Wake up, it's late. You've got to go to Torcello to get those men. Besides, they've got your scuba gear."

Carlo groaned.

"Maria says Giuseppe will go with you; he'll meet you with his boat on the Fondamente."

"Damn."

"Come on, Carlo, we need that money."

"All right, all right." The baby was squalling. He collapsed back on the bed. "I'll do it; don't pester me."

He got up and drank her soup. Stiffly he descended the ladder, ignoring Luisa's good-byes and warnings, and got back in his boat. He untied it, pushed off, let it float out of the courtyard to the wall of San Giacometta. He stared at the wall.

Once, he remembered, he had put on his scuba gear and swum down into the church. He had sat down in one of the stone pews in front of the altar, adjusting his weight belts and tank to do so, and had tried to pray through his mouthpiece and the facemask. The silver bubbles of his breath had floated up through the water toward heaven; whether his prayers had gone with them, he had no idea. After a while, feeling somewhat foolish-but not entirely-he had swum out the door. Over it he had noticed an inscription and stopped to read it, facemask centimeters from the stone. Around this Temple Let the Merchant's Law Be Just, His Weight True, and His Covenants Faithful. It was an admonition to the old usurers of the Rialto, but he could make it his, he thought; the true weight

could refer to the diving belts, not to overload his clients and sink them to the bottom

The memory passed and he was on the surface again, with a job to do. He took in a deep breath and let it out, put the oars in the oarlocks and started to row.

Let them have what was under the water. What lived in Venice was still afloat.
