

## Disappearing Act

Alfred Bester

This one wasn't the last war or a war to end war. They called it the War for the American Dream. General Carpenter struck that note and sounded it constantly. There are fighting generals (vital to an army), political generals (vital to an administration), and public relations generals (vital to a war). General Carpenter was a master of public relations. Forthright and FourSquare, he had ideals as high and as understandable as the mottoes on money. In the mind of America he was the army, the administration, the nation's shield and sword and stout right arm. His ideal was the American Dream.

"We are not fighting for money, for power, or for

world domination," General Carpenter announced at the Press Association dinner.

"We are fighting solely for the American Dream," he said to the 137th Congress.

"Our aim is not aggression or the reduction of nations to slavery," he said at the West Point Annual Officer's Dinner.

"We are fighting for the meaning of civilization," he told the San Francisco Pioneers' Club.

"We are struggling for the ideal of civilization; for culture, for poetry, for the Only Things Worth Preserving," he said at the Chicago Wheat Pit Festival.

"This is a war for survival," he said. "We are not fighting for ourselves, but for our dreams; for the Better Things in Life which must not disappear from the face of the earth."

America fought. General Carpenter asked for one hundred million men. The army was given one hundred million men. General Carpenter asked for ten thousand H-Bombs. Ten thousand H-Bombs were delivered and dropped. The enemy also dropped ten thousand H-Bombs and destroyed most of America's cities.

"We must dig in against the hordes of barbarism," General Carpenter said. "Give me a thousand engineers."

One thousand engineers were forthcoming, and a hundred cities were dug and hollowed out beneath the rubble.

"Give me five hundred sanitation experts, three hundred traffic managers, two hundred air-conditioning experts, one hundred city managers, one thousand communication chiefs, seven hundred personnel experts. . ."

The list of General Carpenter's demand for technical experts was endless. America did not know how to supply them.

"We must become a nation of experts," General Carpenter informed the National Association of American Universities. "Every man and woman must be a specific tool for a specific job, hardened and sharpened by your training and education to win the fight for the American Dream."

"Our Dream," General Carpenter said at the Wall Street Bond Drive Breakfast, "is at one with the gentle

Greeks of Athens, with the noble Romans of . . . er •

Rome. It is a dream of the Better Things in Life. Of music and art and poetry and culture. Money is only a weapon to be used in the fight for this dream. Ambition is only a ladder to climb to this dream. Ability is only a tool to shape this dream."

Wall Street applauded. General Carpenter asked for one hundred and fifty billion dollars, fifteen hundred ambitious dollar-a-year men, three thousand able experts in mineralogy, petrology, mass production, chemical warfare and air-traffic time study. They were delivered. The country was in high gear. General Carpenter had only to press a button and an expert would be delivered.

In March of A.D. 2112 the war came to a climax and the American Dream was resolved, not on any one of the seven fronts where millions of men were locked in bitter combat, not in any of the staff headquarters or any of the capitals of the warring nations, not in any of the production centers spewing forth arms and supplies, but in Ward T of the United States Army Hospital buried three hundred feet below what had once been St. Albans, New York.

Ward T was something of a mystery at St. Albans. Like any army hospital, St. Albans was organized with specific wards reserved for specific injuries. All right arm amputees were gathered in one ward, all left arm amputees in another. Radiation burns, head injuries, eviscerations, secondary gamma poisonings and so on were each assigned their specific location in the hospital organization. The Army Medical Corps had designated nineteen classes of combat injury which included every possible kind of damage to brain and tissue. These used up letters A to S. What, then, was in Ward T?

No one knew. The doors were double locked. No visitors were permitted to enter. No patients were permitted to leave. Physicians were seen to arrive and depart. Their perplexed expressions stimulated the wildest speculations but revealed nothing. The nurses who ministered to Ward T were questioned eagerly but they were close-mouthed.

There were dribs and drabs of information, unsatisfying and self-contradictory. A charwoman asserted that she

had been in to clean up and there had been no one in the ward. Absolutely no one. Just two dozen beds and nothing else. Had the beds been slept in? Yes. They were rumpled, some of them. Were there signs of the ward being in use? Oh yes. Personal things on the tables and so on. But dusty, kind of. Like they hadn't been used in a long time.

Public opinion decided it was a ghost ward. For spooks only.

But a night orderly reported passing the locked ward and hearing singing from within. What kind of

singing? Foreign language, like. What language? The orderly couldn't say. Some of the words sounded like ...well, like: Cow dee on us eager tour.

Public opinion started to run a fever and decided it was an alien ward. For spies only.

St. Albans enlisted the help of the kitchen staff and checked the food trays. Twenty-four trays went in to Ward T three times a day. Twenty-four came out. Sometimes the returning trays were emptied. Most times they were untouched.

Public opinion built up pressure and decided that Ward T was a racket. It was an informal club for goldbricks and staff grafters who caroused within. Cow de on us eager tour indeed!

For gossip, a hospital can put a small town sewing circle to shame with ease, but sick people are easily goaded into passion by trivia. It took just three months for idle speculation to turn into downright fury. In January, 2112, St. Albans was a sound, well-run hospital. By March, 2112, St. Albans was in a ferment, and the psychological unrest found its way into the official records. The percentage of recoveries fell off. Malingering set in. Petty infractions increased. Mutinies flared. There was a staff shake-up. It did no good. Ward T was inciting the patients to riot. There was another shake-up, and another, and still the unrest fumed.

The news finally reached General Carpenter's desk through official channels.

"In our fight for the American Dream," he said, "we must not ignore those who have already given of them

selves. Send me a Hospital Administration expert." The expert was delivered. He could do nothing to heal

St. Albans. General Carpenter read the reports and broke him.

"Pity," said General Carpenter, "is the first ingredient of civilization. Send me a Surgeon General."

A Surgeon General was delivered. He could not break the fury of St. Albans and General Carpenter broke him. But by this time Ward T was being mentioned in the dispatches.

"Send me," General Carpenter said, "the expert in charge of Ward T."

St. Albans sent a doctor, Captain Edsel Dimmock. He was a stout young man, already bald, only three years out of medical school but with a fine record as an expert in psychotherapy. General Carpenter liked experts. He liked Dimmock. Dimmock adored the general as the spokesman for a culture which he had been too specially trained to seek up to now, but which he hoped to enjoy after the war was won.

"Now look here, Dimmock," General Carpenter began. "We're all of us tools, today—sharpened and hardened to do a specific job. You know our motto: A job for everyone and everyone on the job. Somebody's not on the job at Ward T and we've got to kick him out. Now, in the first place, what the hell is Ward T?"

Dimmock stuttered and fumbled. Finally he explained that it was a special ward set up for special combat cases. Shock cases.

“Then you do have patients in the ward?”

“Yes, sir. Ten women and fourteen men.”

Carpenter brandished a sheaf of reports. “Says here the St. Albans patients claim nobody’s in Ward T.”

Dimmock was shocked. That was untrue, he assured the general.

“All right, Dimmock. So you’ve got your twenty-four crocks in there. Their job’s to get well. Your job’s to cure them. What the hell’s upsetting the hospital about that?”

“W-Well, sir. Perhaps it’s because we keep them locked up.”

“You keep Ward T locked?”

“Yes, sir.”

“Why?”

“To keep the patients in, General Carpenter.”

“Keep ‘em in? What d’you mean? Are they trying to get out? They violent, or something?”

“No, sir. Not violent.”

“Dimmock, I don’t like your attitude. You’re acting damned sneaky and evasive. And I’ll tell you something else I don’t like. That T classification. I checked with a Filing Expert from the Medical Corps and there is no T classification. What the hell are you up to at St. Albans?”

“W-Well, sir. . . We invented the T classification. It

They... They’re rather special cases, sir. We don’t know what to do about them or how to handle them. W-We’ve been trying to keep it quiet until we’ve worked out a modus operandi, but it’s brand new, General Carpenter. Brand new!” Here the expert in Dimmock triumphed over discipline. “It’s sensational. It’ll make medical history, by God! It’s the biggest damned thing ever.”

“What is it, Dimmock? Be specific.”

“Well, sir, they’re shock cases. Blanked out. Almost catatonic. Very little respiration. Slow pulse. No response.”

“I’ve seen thousands of shock cases like that,” Carpenter grunted. “What’s so unusual?”

“Yes, sir. So far it sounds like the standard Q or R classification. But here’s something unusual. They don’t eat and they don’t sleep.”

“Never?”

“Some of them never.”

“Then why don’t they die?”

“We don’t know. The metabolism cycle’s broken, but only on the anabolism side. Catabolism continues. In other words, sir, they’re eliminating waste products but they’re not taking anything in. They’re eliminating fatigue poisons and rebuilding worn tissue, but without sleep. God knows how. It’s fantastic.”

“That why you’ve got them locked up? Mean to say... D’you suspect them of stealing food and cat naps somewhere else?”

“N-No, sir.” Dimmock looked shamefaced. “I don’t know how to tell you this, General Carpenter. I . . . We lock them up because of the real mystery. They. . . Well, they disappear.”

“They what?”

“They disappear, sir. Vanish. Right before your eyes.”

“The hell you say.”

“I do say, sir. They’ll be sitting on a bed or standing around. One minute you see them, the next minute you don’t. Sometimes there’s two dozen in Ward T. Other times none. They disappear and reappear without rhyme or reason. That’s why we’ve got the ward locked, General Carpenter. In the entire history of combat and combat injury there’s never been a case like this before. We don’t know how to handle it.”

“Bring me three of those cases,” General Carpenter said.

Nathan Riley ate French toast, eggs benedict; consumed two quarts of brown ale, smoked a John Drew, belched delicately and arose from the breakfast table. He nodded quietly to Gentleman Jim Corbett, who broke off his conversation with Diamond Jim Brady to intercept him on the way to the cashier’s desk.

“Who do you like for the pennant this year, Nat?” Gentleman Jim inquired.

“The Dodgers,” Nathan Riley answered.

“They’ve got no pitching.”

“They’ve got Snider and Furillo and Campanella. They’ll take the pennant this year, Jim. I’ll bet they take it earlier than any team ever did. By September 13th. Make a note. See if I’m right.”

“You’re always right, Nat,” Corbett said.

Riley smiled, paid his check, sauntered out into the street and caught a horsecar bound for Madison Square Garden. He got off at the corner of 50th and Eighth Avenue and walked upstairs to a handbook office over a radio repair shop. The bookie glanced at him, produced an envelope and counted out fifteen thousand dollars.

“Rocky Marciano by a TKO over Roland La Starza in

theeleventh,” he said. “How the hell do you call them so accurate, Nat?”

“That’s the way I make a living,” Riley smiled. “Are you making book on the elections?”

“Eisenhower twelve to five.Stevenson—”

“Never mind Adlai.”Riley placed twenty thousand dollars on the counter. “I’m backing Ike. Get this down for me.”

He left the handbook office and went to his suite in the Waldorf where a tall, thin young man was waiting for him anxiously.

“Oh yes,” Nathan Riley said. “You’re Ford, aren’t you? Harold Ford?”

“Henry Ford, Mr. Riley.”

“And you need financing for that machine in your bicycle shop. What’s it called?”

“I call it an Ipsimobile, Mr. Riley.”

“Hmnm.Can’t say I like that name. Why not call it an automobile?”

“That’s a wonderful suggestion, Mr. Riley. I’ll certainly take it.”

“I like you, Henry.You’re young, eager, adaptable. I believe in your future and I believe in your automobile. I’ll invest two hundred thousand dollars in your company.”

Riley wrote a check and ushered Henry Ford out. He glanced at his watch and suddenly felt impelled to go back and look around for a moment. He entered his bedroom, undressed, put on a gray shirt and gray slacks. Across the pocket of the shirt were large blue letters: U.S.A.H.

He locked the bedroom door and disappeared.

He reappeared in Ward T of the United States Army Hospital in St. Albans, standing alongside his bed which was one of twenty-four lining the walls of a long, light steel barracks. Before he could draw another breath,he was seized by three pairs of hands . Beforehe could struggle, he was shot by a pneumatic syringe and poleaxed~ by 1½ cc of sodium thiomorphate.

- “We’ve got one,” someone said.

“Hang around,” someone else answered. “General Carpenter said he wanted three.”

After Marcus Junius Brutus left her bed, Lela Machan clapped her hands. Her slave women entered the chamber and prepared her bath. She bathed, dressed, scented herself and breakfasted on Smyrna figs, rose oranges and a flagon of Lacrima Christi. Then she smoked a cigarette and ordered her litter.

The gates of her housewere crowded as usual by adoring hordes from the Twentieth Legion. Two centurions removed her chair-bearers from the poles of the litter and bore her on their stout shoulders. Lela Machan smiled. A young man in a sapphire-blue cloak thrust through the mob and ran toward her. A knife flashed in his hand. Lela braced herself to meet death bravely.

“Lady!” he cried. “Lady Lela!”

He slashed his left arm with the knife and let the crimson blood stain her robe.

“This blood of mine is the least I have to give you,” he cried.

• Lela touched his forehead gently.

“Silly boy,” she murmured. “Why?”

“For love of you, my lady.”

“You will be admitted tonight at nine,” Lela whispered. He stared at her until she laughed. “I promise you. What is your name, pretty boy?”

“Ben Hur.”

“Tonight at nine, Ben Hur.”

The litter moved on. Outside the forum, Julius Caesar passed in hot argument with Marcus Antonius, Antony. When he saw the litter he motioned sharply to the centurions, who stopped at once. Caesar swept back the curtains and stared at Lela, who regarded him languidly. Caesar’s face twitched.

“Why?” he asked hoarsely. “I have begged, pleaded, bribed, wept, and all without forgiveness. Why, Lela? Why?”

“Do you remember Boadicea?” Lela murmured.

“Boadicea? Queen of the Britons? Good God, Lela, what can she mean to our love? I did not love Boadicea. I merely defeated her in battle.”

“And killed her, Caesar.”

“She poisoned herself, Lela.”

“She was my mother, Caesar!” Suddenly Lela pointed her finger at Caesar. “Murderer. You will be punished. Beware the Ides of March, Caesar!”

Caesar recoiled in horror. The mob of admirers that had gathered around Lela uttered a shout of approval. Amidst a rain of rose petals and violets she continued on her way across the Forum to the Temple of the Vestal Virgins where she abandoned her adoring suitors and entered the sacred temple.

Before the altar she genuflected, intoned a prayer, dropped a pinch of incense on the altar flame and disrobed. She examined her beautiful body reflected in a silver mirror, then experienced a momentary twinge of homesickness. She put on a gray blouse and a gray pair of slacks. Across the pocket of the blouse was lettered

U.S.A.H.

She smiled once at the altar and disappeared.

She reappeared in Ward T of the United States Army Hospital where she was instantly felled by 1½ cc sodium thiomorphate injected subcutaneously by a pneumatic syringe.

“That’s two,” somebody said.

“One more to go.”

George Hanmer paused dramatically and stared around

at the opposition benches, at the Speaker on the woosack, at the silver mace on a crimson cushion before the Speaker’s chair. The entire House of Parliament, hypnotized by Hanmer’s fiery oratory, waited breathlessly for him to continue.

“I can say no more,” Hanmer said at last. His voice was choked with emotion. His face was blanched and grim. “I will fight for this bill at the beachheads. I will fight in the cities, the towns, the fields and the hamlets. I will fight for this bill to the death and, God willing, I will fight for it after death. Whether this be a challenge or a prayer, let the consciences of the right honorable gentlemen determine; but of one thing I am sure and determined: England must own the Suez Canal.”

Hanmer sat down. The House exploded. Through the cheering and applause he made his way out into the divi.

in a lobby where Gladstone, Canning and Peel stopped him to shake his hand. Lord Palmerston eyed him coldly, but Pam was shouldered aside by Disraeli who limped up, all enthusiasm, all admiration.

“We’ll have a bite at Tattersall’s,” Dizzy said. “My car’s waiting.”

Lady Beaconfield was in the Rolls Royce outside the Houses of Parliament. She pinned a primrose on Dizzy’s lapel and patted Hanmer’s cheek affectionately.

“You’ve come a long way from the schoolboy who used to bully Dizzy, Georgie,” she said.

Hanmer laughed. Dizzy sang: “Gaudeamus igitur. .

and Hanmer chanted the ancient scholastic song until they reached Tattersall’s. There Dizzy ordered Guinness and grilled bones while Hanmer went upstairs in the club to change.

For no reason at all he had the impulse to go back for a last look. Perhaps he hated to break with his past completely. He divested himself of his surtout, nankeen waistcoat, pepper and salt trousers, polished Hessians and undergarments. He put on a gray shirt and gray trousers and disappeared.

He reappeared in Ward T of the St. Albans hospital where he was rendered unconscious by 1½ cc of sodium thiomorphate.

“That’s three,” somebody said.

“Take ‘em to Carpenter.”

So there they sat in General Carpenters' office, PFC Nathan Riley, M/Sgt Lela Machan, and Corp/2 George Hanmer. They were in their hospital grays. They were torpid with sodium thiomorphate.

The office had been cleared and it blazed with blinding light. Present were experts from Espionage, CounterEspionage, Security and Central Intelligence. When Captain Edsel Dimmock saw the steel-faced ruthless squad awaiting the patients and himself, he started. General Carpenter smiled grimly.

"Didn't occur to you that we mightn't buy your disappearance story, eh, Dimmock?"

"S-Sir?"

"I'm an expert too, Dimmock. I'll spell it out for you. The war's going badly. Very badly. There've been intelligence leaks. The St. Albans mess might point to you."

"B-But they do disappear, sir. I—.--"

• "My experts want to talk to you and your patients about this disappearance act, Dimmock. They'll start with you."

The experts worked over Dimmock with preconscious softeners, id releases and superego blocks. They tried every truth serum in the books and every form of physical and mental pressure. They brought Dimmock, squealing, to the breaking point three times, but there was nothing to break.

"Let him stew for now," Carpenter said. "Get on to the patients."

The experts appeared reluctant to apply pressure to, the sick men and the woman.

"For God's sake, don't be squeamish," Carpenter raged. "We're fighting a war for civilization. We've got to protect our ideals no matter what the price. Get to it!"

The experts from Espionage, Counter-Espionage, Security and Central Intelligence got to it. Like three candles, PFC Nathan Riley, M/Sgt Lela Machan and Corp/2 George Hanmer snuffed out and disappeared. One moment they were seated in chairs surrounded by violeffce. The next moment they were not.

The experts gasped. General Carpenter did the handsome thing. He stalked to Dimmock. "Captain Dimmock, I apologize. Colonel Dimmock, you've been promoted for making an important discovery. . . only what the hell does it mean? We've got to check ourselves first."

Carpenter snapped up the intercom. "Get me a combat-shock expert and an alienist."

The two experts entered and were briefed. They examined the witnesses. They considered.

"You're all suffering from a mild case of shock," the combat-shock expert said. "War jitters."

"You mean we didn't see them disappear?"

The shock expert shook his head and glanced at the alienist who also shook his head.

“Mass illusion,” the alienist said.

At that - moment PFC Riley, M/Sgt Machan and Corp/2 Hanmer reappeared. One moment they were a mass illusion; the next, they were back sitting in their chairs surrounded by confusion.

“Dope ‘em again, Dinimock,” Carpenter cried. “Give ‘em a gallon.” He snapped up his intercom. “I want every expert we’ve got. Emergency meeting in my office at once.”

Thirty-seven experts, hardened and sharpened tools all, inspected the unconscious shock cases and discussed them for three hours. Certain facts were obvious: This must be a new fantastic syndrome brought on by the new and fantastic horrors of the war. As combat technique develops, the response of victims of this technique must also take new roads. For every action there is an equal and opposite reaction. Agreed.

This new syndrome must involve some aspects of teleportation. . . the power of mind over space. Evidently combat shock, while destroying certain known powers of the mind, must develop other latent powers hitherto unknown. Agreed.

Obviously, the patients must only be able to return to the point of departure, otherwise they would not continue to return to Ward T nor would they have returned to General Carpenter’s office. Agreed.

Obviously, the patients must be able to procure food and sleep wherever they go, since neither was required in Ward T. Agreed.

“One small point,” Colonel Dimmock said. “They seem to be returning to Ward T less frequently. In the beginning they would come and go every day or so. Now most of them stay away for weeks and hardly ever return.”

“Never mind that,” Carpenter said. “Where do they go?”

“Do they teleport behind the enemy lines?” someone asked. “There’s those intelligence leaks.”

“I want Intelligence to check,” Carpenter snapped. “Is the enemy having similar difficulties with, say, prisoners of war who appear and disappear from their POW camps? They might be some of ours from Ward T.”

“They might simply be going home,” Colonel Dimmock suggested.

“I want Security to check,” Carpenter ordered. “Cover the home life and associations of every one of those twenty-four disappearers. Now. . . about our operations in Ward T. Colonel Dimmock has a plan.”

“We’ll set up six extra beds in Ward T,” Edsel Dimmock explained. “We’ll send in six experts to live there and observe. Information must be picked up indirectly from the patients. They’re catatonic and nonresponsive when conscious, and incapable of answering questions when drugged.”

“Gentlemen,” Carpenter summed it up. “This is the greatest potential weapon in the history of warfare I don’t have to tell you what it can mean to us to be able to teleport an entire army behind enemy lines. We can win the war for the American Dream in one day if we can win this secret hidden in those shattered minds. We must win!”

The experts hustled, Security checked, Intelligence probed. Six hardened and sharpened tools moved into Ward T in St. Albans Hospital and slowly got acquainted with the disappearing patients who appeared and departed less and less frequently. The tension increased.

Security was able to report that not one case of strange appearance had taken place in America in the past year. Intelligence reported that the enemy did not seem to be having similar difficulties with their own shock cases or with POWs.

Carpenter fretted. "This is all brand new. We've got no specialists to handle it. We've got to develop new tools." He snapped up his intercom. "Get me a college," he said.

They got him Yale.

"I want some experts in mind over matter. Develop them," Carpenter ordered. Yale at once introduced three graduate courses in Thaumaturgy, Extra Sensory Perception and Telekinesis.

The first break came when one of the Ward T experts requested the assistance of another expert. He wanted a Lapidary.

"What the hell for?" Carpenter wanted to know.

"He picked up a reference to a gem stone," Colonel

Dimmock explained. "He can't relate it to anything in his experience. He's a personnel specialist."

"And he's not supposed to," Carpenter said approvingly. "A job for every man and every mair on the job." He flipped up the intercom. "Get me a Lapidary."

An expert Lapidary was given leave of absence from the army arsenal and asked to identify a type of diamond called Jim Brady. He could not.

"We'll try it from another angle," Carpenter said. He snapped up his intercom. "Get me a Semanticist."

The Semanticist left his desk in the War Propaganda Department but could make nothing of the words Jim Brady. They were names to him. No more. He suggested a Genealogist.

A Genealogist was given one day's leave from his post with the Un-American Ancestors Committee but could make nothing of the name of Brady beyond the fact that it had been a common name in America for five hundred years. He suggested an Archaeologist.

An Archaeologist was released from the Cartography Division of Invasion Command and instantly identified the name Diamond Jim Brady. It was a historic personage who had been famous in the city of Little Old New York some time between Governor Peter Stuyvesant and Governor Fiorello La Guardia.

"Christ!" Carpenter marveled. "That's centuries ago. Where the hell did Nathan Riley get that? You'd better join the experts in Ward T and follow this up."

The Archaeologist followed it up, checked his references and sent in his report. Carpenter read it and

was stunned. He called an emergency meeting of his staff of experts.

“Gentlemen,” he announced, “Ward T is something bigger than teleportation. Those shock patients are doing something far more incredible...far more meaningful. Gentlemen, they’re traveling through time.”

The staff rustled uncertainly. Carpenter nodded emphatically.

“Yes, gentlemen. Time travel is here. It has not arrived the way we expected it...as a result of expert research by qualified specialists; it has come as a plague. . . an

infection. . . a disease of the war... ..a result of combat injury to ordinary men. Before I continue, look through these reports for documentation.”

The staff read the stenciled sheets. PFC Nathan Riley

disappearing into the early twentieth century in New York; M/Sgt Lela Machan.. .visiting the first century in Rome; Corp/2 George Hanmer. . . journeying into the nineteenth century in England. And all the rest of the twenty-four patients, escaping the turmoil and horrors of modern war in the twenty-second century by fleeing to Venice and ‘the Doges, to Jamaica and the buccaneers, to China and the Han Dynasty, to Norway and Eric the Red, to any place and any time in the world.

“I needn’t point out the colossal significance of this discovery,” General Carpenter pointed out. “Think what it would mean to the war if we could send an army back in time a week or a month or a year. We could win the war before it started. We could protect our Dream. . . poetry and beauty and the fine culture of America.. .from barbarism without ever endangering it.”

The staff tried to grapple with the problem of winning battles before they started.

“The situation is complicated by the fact that these men and women of Ward T are non corn pos. They may or may not know how they do what they do, but in anycase they’re incapable of communicating with the experts who could reduce this miracle to method. It’s for us to find the key. They can’t help us.”

The hardened and sharpened specialists looked around uncertainly.

“We’ll need experts,” General Carpenter said.

The staff relaxed. They were on familiar ground again.

“We’ll need a Cerebral Mechanist, a Cybematicist, a Psychiatrist, an Anatomist, an Archaeologist and a first-rate Historian. They’ll go into that ward and they won’t come out until their job is done. They must get the technique of time travel.”

The first five experts were easy to draft from other war departments. All America was a tool chest of hardened and sharpened specialists. But there was trouble locating

a first-class Historian until the Federal Penitentiary operated with the army and released Dr. Bradley Scrim from his twenty years at hard labor. Dr. Scrim was acid and jagged. He had held the chair of Philosophic History at a Western university until he spoke his mind about the war for the American

Dream. That got him the twenty years hard.

Scrim was still intransigent, but induced to play ball by the intriguing problem of Ward T.

“But I’m not an expert,” he snapped. “In this benighted nation of experts, I’m the last singing grasshopper in the ant heap.”

Carpenter snapped up the intercom. “Get me an Entomologist,” he said.

“Don’t bother,” Scrim said. “I’ll translate. You’re a nest of ants. . . all working and toiling and specializing. For what?”

“To preserve the American Dream,” Carpenter answered hotly. “We’re fighting for poetry and culture and education and the Finer Things in Life.”

“You’re fighting to preserve me,” Scrim said. “That’s what I’ve devoted my life to. And what do you do with me? Put me in jail.”

“You were convicted of enemy sympathizing and fellow-traveling,” Carpenter said.

“I was convicted of believing in the American Dream,” Scrim said. “Which is another way of saying I had a mind of my own.”

Scrim was also intransigent in Ward T. He stayed one night, enjoyed three good meals, read the reports, threw them down and began hollering to be let out .

“There’s a job for everyone and everyone must be on the job,” Colonel Dimmock told him. “You don’t come out until you’ve got the secret of time travel.”

“There’s no secret I can get,” Scrim said.

“Do they travel in time?”

“Yes and no.”

“The answer has to be one or the other. Not both. You’re evading the—”

“Look,” Scrim interrupted wearily. “What are you an expert in?”

“Psychotherapy.”

“Then how the hell can you understand what I’m talking about? This is a philosophic concept. I tell you there’s no secret here that the army can use. There’s no secret any group can use. It’s a secret for individuals only.”

“I don’t understand you.”

“I didn’t think you would. Take me to Carpenter.”

They took Scrim to Carpenter’s office where he grinned at the general malignantly, looking for all the world like a red-headed, underfed devil.

“I’ll need ten minutes,” Scrim said. “Can you spare them out of your tool box?”

Carpenter nodded.

“Now listen carefully. I’m going to give you all the clues to something vast, so strange, so new, that it will need all your fine edge to cut into it.”

Carpenter looked expectant.

“Nathan Riley goes back in time to the early twentieth century. There he lives the life of his fondest dreams. He’s a big-time gambler, the friend of Diamond Jim Brady and others. He wins money betting on events because he always knows the outcome in advance. He won money betting on Eisenhower to win an election. He won money betting on prize fighter named Marciano to beat another prize fighter named La Starza. He made money investing in an automobile company owned by Henry Ford. There are the clues. They mean anything to you?”

“Not without a Sociological Analyst,” Carpenter answered. He reached for the intercom.

“Don’t bother. I’ll explain. Let’s try some more clues. Lela Machan, for example. She escapes into the Roman empire where she lives the life of her dreams as a femme fatale. Every man loves her. Julius Caesar, Brutus, the entire Twentieth Legion, a man named Ben Hur. Do you see the fallacy?”

“She also smokes cigarettes.”

“Well?” Carpenter asked after a pause.

“I continue,” Scrim said. “George escapes into England of the nineteenth century where he’s a Member of Parliament and the friend of Gladstone, Canning and

Disraeli, who takes him riding in his Rolls Royce. Do you know what a Rolls Royce is?”

“No.”

“It was the name of an automobile.”

“You don’t understand yet?” -

Scrim paced the floor in exaltation. “Carpenter, this is a bigger discovery than teleportation or time travel. This can be the salvation of man. I don’t think I’m exaggerating. Those two dozen shock victims in Ward T have been H-Bombed into something so gigantic that it’s no

wonder your specialists and experts can't understand it."

"What the hell's bigger than time travel, Scrim?"

"Listen to this, Carpenter. Eisenhower did not run for office until the middle of the twentieth century. Nathan Riley could not have been a friend of Diamond Jim Brady's and bet on Eisenhower to win an election. . . not simultaneously. Brady was dead a quarter of a century before Ike was President. Marciano defeated La Starza fifty years after Henry Ford started his automobile company. Nathan Riley's time traveling is full of similar anachronisms."

Carpenter looked puzzled.

"Lela Machan could not have had Ben Hur for a lover. Ben Hur never existed in Rome. He never existed at all. He was a character in a novel. She couldn't have smoked. They didn't have tobacco then. You see? More anachronisms. Disraeli could never have taken George Hanmer for a ride in a Rolls Royce because automobiles weren't invented until long after Disraeli's death."

"The hell you say," Carpenter exclaimed. "You mean they're all lying?"

"No. Don't forget, they don't need sleep. They don't need food. They're not lying. They're going back in time all right. They're eating and sleeping back there."

"But you just said their stories don't stand up. They're full of anachronisms."

"Because they travel back into a time of their own imagination. Nathan Riley has his own picture of what America was like in the early twentieth century. It's faulty and anachronistic because he's no scholar; but it's real for him. He can live there. The same is true for the others."

Carpenter goggled.

"The concept is almost beyond understanding. These people have discovered how to turn dreams into reality. They know how -to enter their dream realities. They can stay there, live there, perhaps forever. My God, Carpenter, this is your American dream. It's miracle-working, immortality, Godlike - creation, mind over matter... It must be explored . It must be studied . It must be given to the world."

"Can you do it, Scrim?"

"No, I cannot. I'm a historian. I'm noncreative, so it's beyond me. You need a poet. . . a man who understands the creation of dreams. From creating dreams on paper or canvas it oughtn't to be too difficult to take the step to creating dreams in actuality."

"A poet? Are you serious?"

"Certainly I'm serious. Don't you know what a poet is? You've been telling us for five years that this war is being fought to save the poets."

"Don't be facetious, Scrim, I—"

"Send a poet into Ward T. He'll learn how they do it. He's the only man who can. A poet is half doing it anyway. Once he learns, he can teach, your psychologists and anatomists. Then they can teach us; but

the poet is the only man who can interpret between those shock cases and your experts.”

“I believe you’re right, Scrim.”

“Then don’t delay, Carpenter. Those patients are returning to this world less -and less frequently. We’ve got to get at that secret before they disappear forever. Send a poet to Ward T.”

Carpenter snapped up his intercom. “Send me a poet,” he said .

He waited, andwaited. . . and waited. . . while America sorted feverishly through its two hundred and ninety millions of hardened and sharpened experts, its specialized tools to defend the American Dream of beauty and poetry and the Better Things in Life. He waited for them to find a poet, not understanding the endless delay, the fruitless search’, not understanding why Bradley Scrim laughed and laughed and laughed at this final, fatal disappearance.
